

IN THE CLAIMS:

Claim 1. **(Currently Amended)** An adhesive film for a display, comprising:

- a transparent substrate,
- an anti-reflection layer provided on one surface of said transparent substrate, and
- an adhesive layer provided on the other surface of said transparent substrate,

said anti-reflection layer being formed by resin in which conductive material and low refractive index material disperse therein,

said anti-reflection layer and said adhesive layer each having a predetermined color for rendering said adhesive film achromatic when said predetermined color of said anti-reflection layer is mixed with said predetermined color of said adhesive layer.

Claim 2. **(Currently Amended)** The adhesive film according to claim 1, wherein said anti-reflection layer further has an ~~anti-reflection~~ anti-static function.

Claim 3. **(Withdrawn)**.

Claim 4. **(Previously Presented)** The adhesive film according to claim 2, wherein said anti-reflection layer contains a hard coat material.

Claim 5. **(Previously Presented)** The adhesive film according to claim 1, wherein said anti-reflection layer is formed by a radiation curable resin.

Claim 6. **(Withdrawn)**.

Claim 7. **(Previously Presented)** The adhesive film according to claim 1, wherein said adhesive layer comprises an acrylic adhesive.

Claim 8. **(Previously Presented)** The adhesive film according to claim 2, wherein said adhesive layer comprises an acrylic adhesive.

Claim 9. **(Previously Presented)** The adhesive film according to claim 7, wherein said acrylic adhesive is copolymerized by at least a monomer having a carboxyl group and/or hydroxyl group.

Claim 10. **(Previously Presented)** The adhesive film according to claim 8, wherein said acrylic adhesive is copolymerized by at least a monomer having a carboxyl group and/or hydroxyl group.
